

BARESI TRAINING CENTRE

Welcome to our newly created unit. As the RDI Training Centre, we are dedicated to empowering individuals and organizations with the knowledge and skills needed to promote sustainable development and resilience-building efforts. In today's dynamic and interconnected global landscape, the ability to navigate challenges and contribute to sustainable development is crucial. Therefore we open this space to exchange knowledge, strengthen skills and develop solid networking.

Whether you are an individual looking to enhance your resilience or an organisation seeking to embed sustainability into your operations, our Training Center is committed to providing high-quality, relevant, and transformative learning experiences. Join us on a journey of discovery, empowerment, and growth as we work together towards a more resilient and sustainable future.

We offer services that cover regional, context-specific and locally-based training. These training services aim to drive the qualifications, especially for early career researchers and young professionals in sustainable development and resilience. This training centre works towards achieving this through various training both for internal and external purposes in collaboration with governments, development partners, NGOs, and professional associations. Please do get in touch with us if you want to customise the training to your organisation or community needs.
